

Selection path for the spatial examples

a

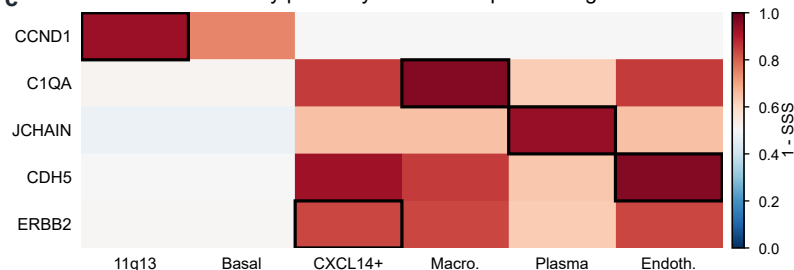

Four examples are concordant positive controls; ERBB2 is retained as a boundary-sensitive discordant control.

b Marker groups have uRNA support

c

uRNA-only proximity identifies expected targets

d

Per-gene evidence carried into the spatial validation figure

gene	uRNA count	uRNA fraction	target	target proximity	rho	call
CCND1	703.2k	0.205	11q13	0.927	0.999	match
C1QA	26.6k	0.489	Macro.	0.958	1.000	match
JCHAIN	5.9k	0.353	Plasma	0.936	1.000	match
CDH5	6.8k	0.242	Endoth.	0.958	1.000	match
ERBB2	1.9k	0.184	CXCL14+	0.834	0.227	discordant
